

Liveaboard

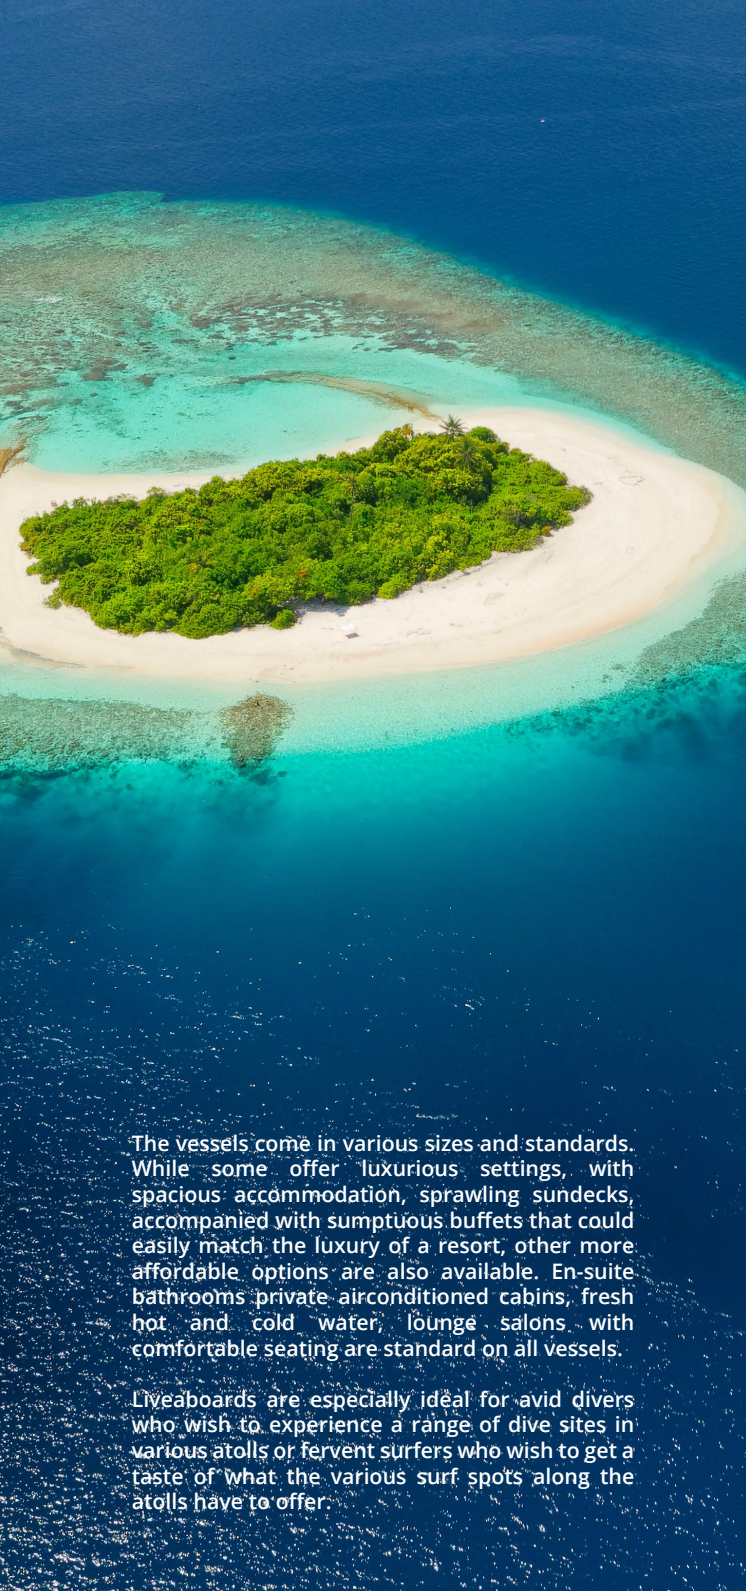

*Explore & experience more
on your holiday*

A cruise on a liveaboard is a great way to experience the Maldives. It's a great opportunity to explore more of the country. You are on the move throughout your holiday, each day a different taste, a new experience.

No matter what you desire you get the chance to experience more of the Maldives on a liveaboard. Surfing, diving or simply cruising, a liveaboard will take you to more surf breaks more dive locations and more atolls. Liveaboards offer you an opportunity to visit various islands across many atolls, offering you a glimpse of life on the islands

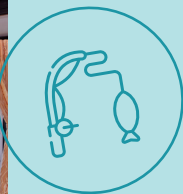

The vessels come in various sizes and standards. While some offer luxurious settings, with spacious accommodation, sprawling sundecks, accompanied with sumptuous buffets that could easily match the luxury of a resort, other more affordable options are also available. En-suite bathrooms private airconditioned cabins, fresh hot and cold water, lounge salons with comfortable seating are standard on all vessels.

Liveaboards are especially ideal for avid divers who wish to experience a range of dive sites in various atolls or fervent surfers who wish to get a taste of what the various surf spots along the atolls have to offer.

Diving on liveaboard offers you a complete immersion into diving in the Maldives. The vessels are well equipped with high quality dive equipment and staffed with professional guides. A support dive vessel accompanies most liveaboards on dive tours. They provide easy access to dive sites once your vessel anchors at the various points along its route.

While most of the liveaboard routes are through the central atolls, several liveaboards also offer routes to the southern and northern atolls. The standard length of a tour is around seven days, but some offer longer tours that would cover more of the atolls.

Barbeques on the beach, snorkeling in pristine reefs, visits to various resorts are part of every liveaboard tour. Dance under the stars and breathe in the fresh air as you cruise through the pristine atolls of the Maldives.
